

UNITED STATES TRANSPORTATION COMMAND

DEFENSE TRANSPORTATION SYSTEM (DTS)

Delivering precise, reliable and efficient end-to-end deployment and distribution capability

USTRANSCOM

The United States Transportation Command (USTRANSCOM) is postured and networked to provide full-spectrum, synchronized, global distribution solutions to support customer requirements.

STRATEGY

Maintain wide range of capabilities:

Provide distribution services including storage, consolidation, and multi-modal transportation, which can be tailored to develop solutions to meet unique requirements.

Early collaboration with customer:

Capture requirements early in the planning process contributes to effective cost-based decisions.

Global Distribution Network:

Establish and maintain a synchronized distribution network to enable global access and project mobility capability anywhere in the world.

RESOURCES

Personnel

USTRANSCOM employs highly skilled global supply chain and distribution experts to plan and execute its worldwide mission.

Military Lift Capability

USTRANSCOM's component commands of Surface Deployment and Distribution Command, Military Sealift Command and Air Mobility Command provide a wide range of air and surface delivery options.

Industry Capability

USTRANSCOM partners with commercial air and sea industries to leverage best business practices and capabilities, improving our ability to deliver end-to-end distribution solutions.

Agency Partners

Collaboration with multiple DoD inter-agency partners enables additional transportation, warehousing, consolidation and shipping services capabilities.

Geographic Combatant Commands

Robust engagement across the global distribution network enables an agile and responsive infrastructure to transport customer cargo internationally.

ENTERPRISE READINESS CENTER

A USTRANSCOM customer-focused, cross-functional organization designed to:
